

a) A snapshot of the simple 2D game we will create

b) Lua script

```
entities = {  
  [0] = {  
    name = "Heliport",  
    layer = 1,  
    components = {  
      transform = {  
        position = { x = 1395, y = 495 },  
        width = 32,  
        height = 32,  
        scale = 1,  
        rotation = 0  
      },  
      sprite = {  
        textureAssetId = "heliport.png",  
        animated = false  
      },  
      collider = {  
        tag = "heliport"  
      }  
    }  
  },  
  [1] = {  
    name = "Tank1",  
    layer = 1,  
    components = {  
      transform = {  
        position = { x = 650, y = 405 },  
        width = 32,  
        height = 32,  
        scale = 1,  
        rotation = 0  
      },  
      sprite = {  
        textureAssetId = "tank-big-left.png",  
        animated = false  
      },  
      collider = {  
        tag = "tank1"  
      }  
    }  
  }  
}
```
